

How Can You Support

I know the Design Program, how can I help you?

- It is very easy to support our project. If you can create ready-to-print designs for a 3Dprinter, you can share your reason for designing products that make life easier for those in need at info@3ddonate.com.

Tip: If you don't know a healthcare professional, you don't need to do long research on where to start. By thinking of your parents and relatives,you can create all kinds of pressure that makes everyday life easier. For example; Holding the glass can sometimes be a difficult situation to grasp. A device to support the grip wouldbe a very good idea.

Are you a clinic owner or Professional Healthcare professional ?

- If you want to support disadvantaged individuals to use their products more comfortably, we can enable individuals to reach you by registering on our platform. With your support, we can provide you with the necessary exercise and activity suggestions for these products that we deliver to disadvantaged individuals free of charge.

Do you want to offer your support differently ?

- Please contact us at info@3ddonate.com. We are always trying to make a difference and invite you to learn more and support.
